

ExpressVote® XL

Full-Face Universal Voting System

Got it covered

No worries about protecting the screen when the unit is in storage or being transported — the built-in cover takes care of it.

Comfortable voting

The 32" full-face, tiltable screen can display an entire ballot on one screen. Voters can view the ballot in their chosen language.

Longest battery backup

With four batteries, the machine could run the entire day on battery power, if needed.

Easy transport

Large, heavy-duty, lockable wheels make for smooth steering and stability.

Integrated thermal printing

No need to purchase or swap out ink cartridges.

Vote selection verification

Allows voters to compare their vote selections on the touch screen against their printed ballot side-by-side.

Paper-based

Voters insert a paper card, which prompts the system to display the correct ballot on the screen.

Universal solution

Screen is adjustable for standing and seated voters. Audio-tactile keypad enables voters to control audio and navigate the ballot.

A versatile solution

- Vote centers
- Polling places

- Early voting
- Election Day

Together with the ExpressPoll® electronic pollbook and ExpressVote® Activation Card Printer, you can quickly check in voters and serve up to 15,000 different ballot styles. This means no more picking and pulling ballots or wasting pre-printed stock — voters get in and out faster.

Easy election management

- Simplifies post-election management because there are no unclear marks to adjudicate. Prevents overvotes and alerts voters of ballot exceptions, like undervotes.
- Produces a voter-verifiable paper record that is scanned, tabulated and saved for auditing purposes.
- Prevents voters from getting the wrong ballot style since poll workers don't need to pick and pull ballots.
- Supports many layout options, including grid style for party voting in rows or columns. This configuration can easily be managed by jurisdictions, allowing for the most efficient use of the ExpressVote XL screen.
- Reduces costs by eliminating the need for printing and storing traditional pre-printed paper ballots.

Over time, the ExpressVote XL will save us money between the cost of paper, ink and other consumables."

Bethany Salzarulo
Cumberland County, PA, Election Director

Poll workers love it

- Shorter Election Day for poll workers — five steps to open and five to close — so they don't need to arrive as early or stay as late.
- Telescoping privacy curtain includes a vote session light, which allows poll workers to monitor whether the device is in use without compromising voter privacy.

A great experience for voters

- Fully compliant with the Americans with Disabilities Act (ADA), ExpressVote XL enables all eligible voters to make their selections privately and independently.
- Improves voter confidence because the interface prevents them from overvoting and alerts them to ballot exceptions, like undervotes.
- Provides voters the opportunity to review their selections twice before tabulation — on the summary screen and the printed card.
- Once their ballot is printed, scanned and viewable in the review window, voters can have their printed selections read back to them.
- All voters can reinsert their printed ballot into any ExpressVote XL, including the one they voted on, and verify they voted as they intended either on the vote summary screen or by listening to the audio playback.
- Extremely fast voting experience — around 80 seconds on average and as little as 20 seconds.

Security you can count on®

ExpressVote XL offers so many security features, we couldn't include them all here. To learn more about how we protect our systems and data, visit essvote.com/feature/security.

Specifications

Ballot style capacity: Up to 15,000
