

# ExpressPoll<sup>®</sup>

## Electronic Pollbook

### Two-step go-live

No assembly required — simply remove the ExpressPoll from the custom carrying case and press the power button.

### Dynamic voter search

Increases the accuracy of identifying a voter by searching for them using name, date of birth, voter ID, address or party affiliation.

### Easy connection

Built-in peripherals include USB ports and a camera for barcode scanning.

### Portable and protected

Flip stand enclosure protects the tablet during transport and throughout use in the polling place.

### Smooth and accurate check-in

Intuitive interface provides easy-to-understand, detailed voter information.

## Providing a smooth voting experience from start to finish

The industry-leading ExpressPoll application is designed to work seamlessly with ES&S' Universal Voting System product family and tabulators, providing voters with a smooth voting experience from start to finish. Designed to meet the needs of various election types and workflows, ExpressPoll can accommodate all state-required configurations.

## Confidence for election officials

- Helps reduce provisional voting by providing up-to-date absentee status or directions to the correct polling place.
- When used with ExpressPoll Connect, all updates are automatically sent and received in near-real time across the jurisdiction, without any action required by the poll worker.
- Generates voter, ballot and turnout reports on demand.
- Operates in kiosk-mode, preventing poll workers from closing the application or accessing any non-pollbook related functionality.
- Microsoft® Surface Go tablets utilize the Windows operating system, which supports critical security updates from Microsoft.

## Security you can count on®

- ExpressPoll uses role-based security and can assign different user access levels, preventing unauthorized access to sensitive functions on the pollbook.
- If an ExpressPoll is unlawfully removed from a polling place, election officials can protect data from the unit remotely.
- Data used by the ExpressPoll system is strongly encrypted.

## Quick and accurate voter verification for poll workers

- On-screen prompts guide poll workers through each step of the process.
- Poll workers can confidently complete a voter look-up and issue the correct ballot using minimal steps.
- Voter records displayed in search results use actionable color coding, making it easy for poll workers to understand the relevant action they need to take and reducing the time it takes to process a voter.
- Poll workers are able to quickly redirect voters who appear at the wrong polling place and provide detailed information for their correct voting location.

Our poll managers told us ExpressPoll is fantastic — so simple to use. They can quickly and confidently understand what actions they need to take for each voter.”

**Alan Helms, York County, SC, Registration and Elections Deputy Director**

## Peace of mind for voters

- Provides a quick and efficient check-in process.
- Instills confidence that voters are in the correct polling location and were issued the correct ballot style.
